### Rats in Discard

The latest news from Paris is to the effect that the harem skirt has hit the toboggan, so to speak, and is now regarded as de trop by the real nifty dressers over on the other side of the big pond. But the best news is that "rats" and false hair are also taboo and will no longer be worn by strictly up to date followers of the modes. For all of which Dame Fashion has the enthusiastic thanks of the male portion of the inhabitants, at least.

### Wed in California

A wedding of interest to Ordway people occurred at Holtville, Calif., October 22, news of which had just reached here. The high contracting parties were Miss Maude Ordway of Burlington Junction, Mo., and Mr. Joseph C. Young of Seattle, Wash., the latter being a nephew of Mrs. A. M. Breneman of this city. The ceremony was a most elaborate one, many friends of the happy couple being present from a distance. They will take up their home in Seattle after a honeymoon spent at Long Beach, Los Angeles and other coast points.

### Banks Consolidate

Last week the Citizens Exchange bank and the State bank of Sugar City were consolidated and will hereafter be conducted under the name of the former institution, it taking over the assets and assuming the liabilities of the latter organization. The deal includes the banking house of the Citizens, which will hereafter be occupied by the State bank. J. E. Williams will act as cashier of the consolidated concern after January 1, when Mr. Walton, the present cashier, will retire. F. S. Howard will also be interested in the management of the bank. It is understood that the capitalization will be increased to \$15,000 the first of next year.

### New Fire Fighter

W. R. Barton, the prevention inspector of the Missouri Pacific and Iron Mountain railways, has studied out a fire fighting apparatus which can be attached to railroad locomotives and effectively used in preventing conflagrations on the tracks. A test of the appliance was recently made in St. Louis. It was demonstrated that a stream of water could be thrown 65 feet in the air with 200 lbs. of steam pressure on a locomotive, and it has been decided to equip all yard engines on the entire system and some of the road locomotives with it.

The tanks of the large yard engines hold 6,000 gallons of water. Barton's plan is to carry 50 ft. of 1½ inch steam hose on a reel under the running board of the engine. The cost of the apparatus installed will be \$35.00, and by its use every locomotive will be made a fire fighting engine.

### Apple Congress

The American Apple congress, will be held in the auditorium in Denver November 14, 15 and 16. Delegates have been named from Massachusetts, Vermont, New York, Ohio, Wisconsin, Iowa, Missouri, Tennessee, Texas and many other states of the east and south, as well as from all of the apple producing states of the west.

There are grave matters relative to the apple industry that require attention. The uniform grading and packing law, known as the Lafean bill, which is before the federal congress, is one of these important questions. Others are the distribution question, cost of production and marketing and the subject of scientific culture. Every member and delegate will have the privilege of introducing subjects from the floor for discussion. Military reviews, races, illuminations, fêtes, etc., will add to the interest of the congress session.

### What's Your Family Worth?

If your family is worth the best you can afford in house and food and clothes, is it not worth the best reading as well? And the best reading—best for boys and girls, best for men and women—is to be found in the Youth's Companion.

Of stories alone the Companion will print nearly 300 in 1912. With all the rest of the paper thrown in, and counting the glorious long serial stories, they cost the subscriber less than a cent apiece. Moreover, you will look long before you will find stories so varied and interesting—stories of coolness in the face of peril, strange adventures with creatures of the forest and the sea, moving stories of life's obscure heroism, stories breezy with good-natured humor, quaint and curious character sketches.

Now is the time to subscribe, for you will receive free from the time your \$1.75 is received all the issues for the remaining weeks of 1911, containing the opening chapters of Ralph D. Paine's great serial story of the Boxer rebellion, "The Cross and the Dragon." And there is the gift of the Companion calendar for 1912, "On the New England Coast," lithographed in ten colors and gold. Only \$1.75 now for the 52 weekly issues, but on January 1, 1912, the subscription price will be advanced to \$2.00. The Youth's Companion, 144 Berkeley St., Boston.

## DARWINISM DYING, IS UNSCIENTIFIC.

### The Fixity of Species Is Established.

"The Life Is In the Blood"—"Sins Visited Upon the Children Unto the Third and Fourth Generation."

MID-OCEAN, OCTOBER 8.—PASTOR RUSSELL is enroute for his fall visit to his London charge, full of vigor. Crossing the ocean loses no time for him. He is accompanied by his stenographer, Mr. Rutherford, and through the newspapers

preaches weekly to about twelve millions in the United States, Canada, Great Britain and Australia. His text today was, "For the life of the flesh is in the blood; and I have given it to you upon the altar as an atonement for your souls."—Leviticus xvii, 11.

The trend of all scholars within the past forty years in particular has been away from the Bible. Even those few who still contend for the Bible concede much to the Higher Critics and merely strive to retain a hold upon certain shreds of truth. The Bible is suffering at the hands of Christendom. Or perhaps we would better say, Christendom is suffering from letting loose its hold upon the Bible. The Bible theory, that all the sin and death manifest in the world resulted from Adam's disobedience, is now generally denied. Consequently those who still preach a forgiveness of sins and an escape from the penalty of sin are in the minority. And those who admit that the death of Jesus was necessary as a sin-offering, the Just for the unjust, are extremely few.

Darwin's Evolution theory, that man sprang from a monkey parentage and has been evolving higher and higher for thousands of years, finds apparent support in the rapid growth of intelligence during the past fifty years. But those who heed the Bible find a more satisfactory explanation in its teaching, that we are in the dawning of a New Dispensation—the Messianic period so long promised of God as the time in which all the families of the earth will be blessed.

**The Blood of Atonement**  
The Bible theory of man's sin and condemnation to death and of a redemption of Adam's race from the power of death by the blood of Jesus is one consistent narrative. Because one man alone was the original sinner and the sentence came by one, therefore it was possible for Divine mercy to arrange that by the sacrifice of the Righteous One, the Just for the unjust, the entire race of Adam might be judicially freed from the death sentence and be permitted to have a resurrection from the dead and the opportunity of restitution and to appropriate themselves to God for everlasting life.

This, the Bible theory, lays the whole stress of salvation upon the work of our Redeemer. By it a way of life through resurrection and restitution has been opened up. This is the meaning of our text and is fully concurred in by the Apostle, who says, "Almost all things are by the Law purged with blood; and without shedding of blood is no remission" of sins.

### Latest Deductions of Science

Scientists now learn not only that different species will not amalgamate, but that different breeds of the same species crossed cannot be maintained, but will revert again to their originals in the third or fourth generation. Undoubtedly this was what troubled Mr. Darwin in his rearing of fancy breeds of pigeons and his inability to maintain the fancy varieties. The same principle is found everywhere at work. Different varieties of peas crossed have produced new varieties only to return in the third or fourth generation to their originals.

**Third and Fourth Generation**  
Notice, said Pastor Russell, a text which always seemed to us hard and cruel, but which we find, on the contrary, to be merciful and gracious. It reads, "I am a jealous God, visiting the iniquities of the parents upon the children unto the third and fourth generation of them that hate Me."

The life is in the blood. The law of heredity carries impurity and disease through the blood in micro-organisms. Were it not for the Divine provision that these small organisms of disease or blood impurity will die out in the third or fourth generation, our race long since would have been wiped off the face of the earth. The Divine arrangement that infectious germ diseases such as syphilis will die out in the third or fourth generation is a most merciful one.

Thus God shows mercy unto thousands of them that love Him and seek to keep the Divine commandments. Thus the theories of man crumble, one after another as the decades slip by and as they have been doing for centuries

## COAL!

You need coal right now and you'll need it for several months to come. Why not buy it here, where the price fits the quality? We handle the best coal on the market and guarantee you full weight and satisfaction. Get your bin filled now before winter sets in earnest. ## Columbian National Life Ins. Co. of Boston

Office of the President, Boston, Mass.

To the Policyholders of the Company:

Since January 1, 1911, the invested assets of the company have increased by over a million dollars; an increase of ten millions new and re-insured business has been made in the volume of insurance outstanding and new business is coming in at a rate in excess of anything experienced since the general check which the life insurance business suffered at the time of the investigation some years ago.

The prospects were never brighter for the Columbian National, and we trust our policyholders will give their co-operation and support to the company's local representatives in their work of producing new business and so assist in the steady growth which we are now experiencing. Respectfully yours. ARTHUR E. CHILDS, President.
