AN OPEN LETTER (About Bronchitis)

TO THE PUBLIC: In March, 1914, I became afflicted with an attack of Bronchitis which forced me to remain in bed for two months. The doctor in attendance changed the medicine several times, and instead of improvement, I seemed to grow worse. For a while I was despondent, until I read a little pamphlet advertising the "Eucosmo Mentho-Lanase." Discouraged with what I had been doing without effect, I was willing to try almost anything.

"Miracle Wheat" At Panama Exposition

"THE EARTH SHALL YIELD HER INCREASE, AND GOD SHALL BLESS US."—Psalm 67:6.

Interesting Letter from Kansas, the Banner Wheat State—Origin of "Miracle Wheat"—U. S. Government Report of This Wheat—A Sign of the Times of Restitution—The Millennium.

Miracle Wheat Grown by W. A. Jarrett, Columbus, Kansas. Represents the State of Kansas at World's Fair, San Francisco, 1915.

In this past year of bountiful wheat crops it is worthy of notice that the State of Kansas takes the lead. Harvest reports state that Kansas raised in 1914 twice as much wheat as her nearest competitor, and 13 per cent. more than any other State has ever produced in a single season, namely, 130,324,858 bushels, valued at \$15,583,921.00.

Columbus, Kan., Feb. 5, 1915. International Bible Students Association, Brooklyn, N. Y. Dear Friends and Brethren: I enclose herewith picture and data relative to the Miracle Wheat of the State of Kansas. This picture, among thousands of others, of the best field raised in the State was sent to the Secretary of the State Board of Agriculture, J. C. Mohler. From this collection was to be chosen the one which would represent the State at the World's Fair, which convenes the 26th of this month.

Now the question in this matter did not know that this was Miracle Wheat; hence they had nothing to bias their decision. I am very glad to see the award. I grew seventy acres of this wheat and planted and cared for it in the regular ordinary way and had no trouble in raising it. The seed was from the State Board of Agriculture, J. C. Mohler. On this section of the country we have to sow more to the acre than in some localities; hence we could not follow the many varieties we sow at the rate of one-half bushel and some at the rate of one bushel to the acre. We sowed and we found the three pecks to be the best. This field yielded forty-nine bushels to the acre, more than twice the average yield of wheat in this vicinity and in many instances more than the rate of seed. If this information is of any value to you we are thankful for the opportunity to tell the world.

Mr. Stoner and "Miracle Wheat" It will be remembered that this prolific wheat was discovered by Mr. W. A. Jarrett, a farmer of Fincaiste, Botocourt Co., Va., growing in the corner of his field a stool of one hundred and forty-two heads of grain in a field on a seedling plot. Mr. H. A. Miller, U. S. Government Entomologist at the Agricultural Department, sent to investigate the matter, reported: "The yield has been from two to three times the yield of other varieties grown on the farm under the same conditions of culture, except the rate of seeding, which was two pecks to the acre, while other varieties were sown at the rate of eight to ten pecks per acre, which is the common practice of farmers in the vicinity."

"Miracle Wheat" and the Approaching Millennium. Pastor Russell gave this wheat wide publication through his journal at the time of its discovery. He holds that, according to the Bible, we are on the threshold of the Millennium, and that during that period the earth will yield her increase to the extent that wheat will be the earning of one's living will be unnecessary. The Pastor hailed this wheat as one of the many signs of the Lord's blessing already coming to the earth—in preparation for future blessing under Messiah's Reign, when the most great of foes in the material will be used in irrigation, fertilization, scientific and intensive farming. This he believes to be the purport of the prophecy which declares that men shall beat their swords into plowshares, and their spears into pruning hooks.

Some six years before "Miracle Wheat" was brought before the public, one of Pastor Russell's friends made a donation of several bushels of this seed-wheat, stipulating that it be sold at a dollar a bushel—and type cents less than the original price of the species was selling—and that the proceeds, after paying incidental expenses of freight, packing and postage, should be used by the Wheat
