MORE DEAD FLIES IN THE PRECIOUS OINTMENT.

Pastor Russell Points Out More Deceptive Additions to the Word of God Contained in Our Common Version Bibles, but Shown to Be False Because Not Found in the Oldest Greek MSS.—One of These "Flies"—Has Moulded Accepted Theology—Dead Flies Cause the Apothecary's Ointment to Stink—Ecclesiastes 10:1.

Not long ago I pointed out that the last twelve verses of St. Mark's Gospel, in our Common Version, are spurious—so recognized by all scholars, because these verses are not to be found in any of the oldest Greek MSS. and were evidently added to the Word of God in the Seventh Century or later. Moreover, we gave proofs of the untruthfulness of this addition. Is it true that whoever believes the Gospel of Christ may handle serpents with impunity and may drink deadly poison without harm? Surely not. It is nothing short of a sin for those who know better to acknowledge these verses and to use them to bolster up theories of Divine Healing. It is as much a crime to add to the Word of God as to take away from it.

Today I invite attention to some other "dead flies," some other additions to God's Word, which have had much to do with existing theology once delivered to the saints. Take, for instance, the closing words of the Lord's Prayer:—

"Thine is the Kingdom and Power and Glory."

These words, if uttered by our Lord, should be found in the old Greek MSS. But they are not found therein. They are, therefore, to be rejected as additions made by people centuries after Matthew's Gospel was written. These words were introduced when the faith of the Church respecting the Kingdom of Messiah was changed or changing from what it was originally.

All through the New Testament the second coming of Christ in power and glory to establish His Kingdom and to glorify the Church, His Bride, is set for the end of this Gospel Age. But as the time grew long a change of sentiment came into the Church. It became popular and rich. Its bishops were respected. Finally the theory prevailed that God did not intend to delay the establishment of the Kingdom until the second coming of Christ, but did intend to establish it in the hands of the Church during this Age and to use the Church for the conquering of the world and the fulfilling of all the promises of the past.

In line with this the most prominent bishop of the time was recognized as Divinely appointed to represent Christ in the world and to reign over the nations in His stead and to bring about the Messianic reign, etc. This was the Bishop of Rome, who subsequently was styled the Pope and who claimed and was accorded the honorific title, "Vicar-general of the Son of God." It is said that the equivalent of this title is worn to this day by the Pope on his tiara, or three-crowned hat—Vicararius Dei Filii.

"Thy Kingdom Come on Earth."

The Lord's prayer was already in the Scriptures, and was known to many. It could not be eliminated. But some zealous person, fully believing that God's Kingdom had come, felt justified in amending the prayer to correspond to what he supposed were the facts. Hence the prayer which begins, "Thy Kingdom come," is made to end by saying, "Thy Kingdom has come in its glory and power."

How glad we are to see the Truth on this subject; that the Kingdom of God's dear Son has not yet been set up in any sense of the word—that it is still future. It cannot be set up until this Gospel Age ends and the "elect" sanely few of every nation, Jew and Gentile, shall be changed from earthly to heavenly nature by the First Resurrection, which will qualify them to be kings and priests unto God and unto Christ and to reign with Him a thousand years (Revelation xx, 6).

It is well that all Bible students should mark this "fly" and extract it from the Precious Ointment and notice how much sweeter and fresher the Lord's prayer is to them forever.

"Oh, What a Whopper!" Who cannot sympathize with the great infidel, Thomas Paine, who when reading the last verse of St. John's Gospel, exclaimed, "Oh, what a whopper!" It reads, "And there are also many other things which Jesus did, the which, if they should be written every one, I suppose that even the world itself could not contain the books that should be written" (John xxi, 25).

Surely anyone of reasoning mind should see the absurdity of such a statement. Surely all Christian ministers should have informed the Lord's sheep under their care respecting what is and what is not the Word of God. The Bible, as it was recognized by the Apostolic Church and written down in the original Greek MSS. Why any Christian minister should assail me because I endeavor to do for the people what he has neglected to do I cannot understand. I must leave it to the Lord to judge between us.

I resent Higher Criticism and accept the Word of God in full. I reject nothing because of my own or other men's surmises, but merely go by the facts. If the oldest Greek MSS. do not contain certain passages of Scripture, how could they get into later MSS., except as spurious additions?

A tablespoonful of spirits of camphor stirred in a gallon of water makes a very good solution with which to spray plants that are afflicted with the green lice. This spray fixes the lice and does not harm the foliage plants, to which it is applied.

While other members of the animal kingdom may fall to multiply as nature intended, it is pretty safe to assume that the old frosted eared brindle tabby cat will some warm morning soon lead her bevy of kittens from some well protected and secluded spot. This kitten crop is one that is not reduced by frost, blight or drought.

Kansas legislators are to be commended for a piece of legislation lately passed, at once sensible and merciful, which makes it possible to use the idle convicts in the state penitentiaries in the building of a highway from Leavenworth to Kansas City, Kan. The taxpayers will get a return from the labor of the convicts, and the latter will be the better for the physical exercise and fresh air which they will get.

In contrast to the idea—all too prevalent—that one cannot make money raising stock on less than from 100 to 200 acres may be cited the experience of a Pennsylvania dominie who kept thirty head of stock on fifteen acres, growing all the roughage for them on this area, and who by prudent management was able to pay off a mortgage of \$7,200 on the place in the course of seven years. To add to his troubles, the farm was badly run down at the time he bought it. While the account does not state, it is fair to assume that at least half of the stock kept consisted of dairy cows, by the keeping of which the building up of the fertility of the soil was an easy matter.

In all the territory where soft coal is relied upon chiefly as fuel for the kitchen stove it is the very bane of cleanly housewives, smearing their floors, soiling the wall paper, dirtying dishes and blackening wearing apparel. The chief fault with this kind of fuel is that under the conditions which usually prevail a complete combustion of the coal is not secured—that is, the smoke and soot are not consumed, but clog and retard the stove, the pipes and flues. While the trouble cannot be entirely done away, it can be materially improved by replenishing the stove more frequently and breaking the coal up into finer pieces. If at hand it will be found a great help to use either coals or wood with the soft coal. In some localities it is possible to get coke from which the oils and soot producing elements have been largely removed. This makes a very hot fire and will have to be watched closely and renewed quite frequently.

It is only recently that the full value of rape as a pasture for growing pigs has come to be fully realized, and this only by the most progressive hog raisers. One acre of a good stand of rape will furnish pasture for from fifteen to twenty-five hogs, depending upon its rankness and thriftiness. The plant prefers a moist, cool soil, full of humus, and should be sown in the spring as soon as the danger of frost is over. If broadcasted, from six to eight pounds seed should be used per acre. If drilled, as is sometimes done, in rows from twenty to thirty inches apart, from three to five pounds will answer. Excellent results are also secured by sowing about five pounds of seed on a part of the land to be devoted to oats and clover, the latter seed being put in after the rape. In this case the rape will germinate and grow slowly until the oats are cut, after which it will grow more rapidly, or the oats, clover and rape patch may be used as a pasture as soon as it gets six or seven inches high, no attempt being made to harvest the grain. Such pasture gives an excellent variety and together with corn and all meal and such milk or buttermilk as is available makes possible very economical pork production. Rape is sometimes sown with satisfactory results as late as the 15th, but it will not do well if the weather is dry during the weeks following.

Taken Up by the undersigned on his one black horse about 12 years old, no brand, small star in forehead, white spot on right hip, fore-op trimmed, had harness marks when appeared, has been on place since last December.
